

## **LESSON 2 - ASSIGNMENT**

1. Submit your list of food plants which can be grown in your locality.
2. What other food plants do you think might be able to grow if you were to create some special structure for them (eg. a glasshouse)? Submit up to 1 page.
3. a) Draw a plan of your garden (on A4 paper), as it now exists. (If you don't have your own garden; do this for a friend's property). Now plan how you would like to change it to produce a garden which supplies you with a significant amount of your food needs.  
b) Draw a second plan (on A4 paper) showing how your garden could become more productive.
4. Take a photograph of your soil. Name the type of soil using the chart found in the notes for this lesson. Send it in with this assignment along with your suggestions on how the soil should be prepared before planting. Submit approximately 1 page.
5. Design a crop rotation system for the vegetable garden you planned in question 3b. Send in your design and explain why you have designed it this way. Submit around 1 page.
