

LESSON 8 - ASSIGNMENT

1. Write a report on what you found out in Set Task 1 – outline the various methods and formats that can be used to present wedding photos. If possible give a run down on fees that are commonly charged for the various types of presentations. Submit approximately 1½ - 2 pages of work.
2. Outline the various methods used in processing wedding photos as discovered in your research from Set Task 2. Also, list the types of equipment and software available for photo processing as researched in your Set Task 2. 1 page is fine.
3. Submit the 3 'before' and 'after' (processing) shots from your Set Task 3. Write a brief outline for each photo describing the methods and techniques you used to improve these photos.

Make sure you use the re-sizing tool in the student room so your file sizes are not too big to submit.
