

## LESSON 2 ASSIGNMENT

1. Make up a table comparing 10 different models/types of mowers.  
For example:

Type of mower	Speed of Mowing	Quality of Cut	Machine Reliability
Victa Model XYZ			
Scott Bonnar ABC			
DavesonJahn model 000			
.....etc			

Note: Think carefully and choose your own criteria for making a comparison between different mowers. You may choose any mowers you wish (provided they are used for sports turf care); and use criteria which you consider significant to compare them.

2. Select a mower suitable for one of the following:
  - A bowling green in your locality
  - A golf green in your locality
  - A turf wicket in your locality
  - A lawn tennis court in your locality

Explain your selection. Explain how you would use the mower which you selected for each of the above applications. Write up to 1 page.

3. Describe the green and sportsground which you investigated in your set task. Give a detailed account of how you would mow each of these sports turfs, including the type of mower you would prefer to use, and an estimate of the time you believe it would take to complete each mowing job. Write approximately 1 page.
