## ACS Releases New 2017 Course Handbook

ACS Distance Education have recently released a new digital course handbook for 2017.

Download the 2017 course handbook to learn about all the courses that ACS Distance Education has on offer.

The handbook introduces our huge range of courses. With over 600 distance education courses covering such a wide array of topics, this handbook is an essential compendium for anyone interested in further studying on a personal or professional level.

Some of the areas that ACS Distance Education courses include are gardening, horticulture, self-sufficiency, environmental studies, agriculture, psychology, health, leisure and fitness, hospitality animal care, science and business studies. Our distance courses are flexible to suit our students' busy lifestyles, and our courses can be taken online, via correspondence or e-learning.

Our courses are the result of continuous input from academic officers, students and industry over a period of more than 35 years. The input has come from formal channels (e.g. advisory committees, industry reports, student and employer surveys, etc), and informally, by alterations/improvements being made to course notes whenever an improvement is required.

To download your free electronic copy of the course handbook, please visit our website:
